Computational Tools

Finding possible transition states of defects in silicon-carbide and alpha-iron using the dimer method
F. Gao, G. Henkelman, W.J. Weber, L.R. Corrales and H. Jónsson 1
Sinks strengths revisited
N.V. Doan, J.L. Bocquet and G. Martin 8
Topological approach to separate order from disorder in simulated atomic arrays
V.A. Borodin 13
Improvement of the repulsive part of the classical interatomic potential for SiC
V. Belko, M. Posselt and E. Chagarov 18
Non-thermodynamic approach to including bombardment-induced post-cascade redistribution of point defects in dynamic Monte Carlo code
V.A. Ignatova, I.R. Chakarov and I.V. Katardjiev 24

Metals

Atomic-scale modelling of primary damage and properties of radiation defects in metals
Yu.N. Osetsky and D.J. Bacon 31
Ab initio contribution to the study of complexes formed during dilute FeCu alloys radiation
C.S. Becquart and C. Domain 44
Stacking fault tetrahedra formation in the neighbourhood of grain boundaries
M. Samaras, P.M. Derlet, H. Van Swygenhoven and M. Victoria 51
Metals far from equilibrium: From shocks to radiation damage
E.M. Bringa, B.D. Wirth, M.J. Caturla, J. Stölken and D. Kalantar 56
Plastic deformation of copper single crystals by simulation using X-ray Lang method and molecular dynamics
M. Doyama, Y. Kogure, T. Nozaki and Y. Kato 64
Copper precipitation in iron: a comparison between metropolis Monte Carlo and lattice kinetic Monte Carlo methods
O. Khrushcheva, E.E. Zhurkin, L. Malerba, C.S. Becquart, C. Domain and M. Hou 68
Thermal stability of helium–vacancy clusters in iron
K. Morishita, R. Sugano, B.D. Wirth and T. Diaz de la Rubia 76
Modeling of aging in plutonium by molecular dynamics
P. Pochet 82

doi:10.1016/S0168-583X(03)01164-9

Semiconductors and Compounds

Threats to ICF reactor materials: computational simulations of radiation damage induced topological changes in fused silica
A. Kubota, M.-J. Caturla, J. Stolken, B. Sadigh, S. Reyes, T. Diaz de la Rubia and J.F. Latkowski .. 88
Molecular dynamics study of defect formation in GaN cascades
J. Nord, K. Nordlund, J. Keinonen and K. Albe 93
Modeling SiC swelling under irradiation: Influence of amorphization
A. Romano, M. Bertolus, M. Defranceschi and S. Yip 100
Formation and stability of radiation defect complexes in Si and Si:Ge: Composition and pressure effects
M. Ganchenkova, A. Nazarov and A. Kuznetsov 107
Defect characterization of low-energy recoil events in silicon using classical molecular dynamics simulation
G. Otto, G. Hobler and K. Gärtner 114
A first principles study of native defects in α-quartz
G. Roma and Y. Limoge 120
Damage production in low-energy Au and Si irradiation of a-Si: Influence of projectile mass
M. Koster and H.M. Urbassek 125
Molecular dynamics simulation method for calculating fluence-dependent range profiles
J. Peltola, K. Nordlund and J. Keinonen 132
Statistical 3D damage accumulation model for ion implant simulators
J.M. Hernández-Mangas, J. Lázaro, L. Enriquez, L. Bailón, J. Barbolla and M. Jaraíz 138
Comparison of boron halide, decaborane and B implants in Si from Molecular Dynamics simulations
R.P. Webb, S.H. Winston, R.M. Gwilliam, B.J. Sealy, G. Boudreault, C. Jeynes and K.J. Kirkby 143

Particle-Solid Interaction: Sputtering

Crystallographic analysis of amorphization caused by ion irradiation
S.T. Nakagawa, M. Iwatani, T. Ono, Y. Hada and G. Betz 149
Monte Carlo simulation of the interaction of electrons with supported and unsupported thin films
M. Dapor 155
Transient sputtering of silicon by argon studied by molecular dynamics simulations
E.F.C. Haddeman and B.J. Thijsse 161
Molecular dynamic simulations of the sputtering of multilayer organic systems
Z. Postawa, K. Ludwig, J. Piaskowy, K. Krantzman, N. Winograd and B.J. Garrison 168
Computer modelling of ballistic particle ejection from NaCl
D. Ramasawmy, S.D. Kenny and R. Smith 175
Computer simulation of the topography evolution on ion bombarded surfaces
M. Zier and W. Hauffe 182

Hot Chemistry

Photochemical ablation of organic solids
Y.G. Yingling and B.J. Garrison 188
Computer simulation of chemical erosion of graphite due to hydrogen ion bombardment
J.H. Liang, M. Mayer, J. Roth and W. Eckstein 195
Theoretical simulations of atomic and polyatomic bombardment of an organic overlayer on a metallic substrate
K.D. Krantzman, R. Fenno, A. Delcorte and B.J. Garrison 201

Nanostructures and Thin Films

Nonequilibrium self-organization in alloys under irradiation leading to the formation of nanocomposites
R.A. Enrique, K. Nordlund, R.S. Averback and P. Bellon 206
Comparison of protons, carbon and fullerene impacts on a carbon cylinder
R.P. Webb and I.H. Wilson 217
Making junctions between carbon nanotubes using an ion beam
A.V. Krasheninnikov, K. Nordlund, J. Keinonen and F. Banhart 224
Simulation of grain growth in nanocrystalline nickel induced by ion irradiation
W. Voegeli, K. Albe and H. Hahn 230
Channeling of high energy beams in nanotubes
S. Bellucci, V.M. Biryukov, Yu.A. Chesnokov, V. Guidi and W. Scandale 236
Simulation of the non-equilibrium processes for tetrahedral amorphous carbon: Deposition and structural relaxation
A.Yu. Belov and H.U. Jäger 242
Kinetic Monte Carlo simulation of self-organized pattern formation in thin film deposition
F. Elsholz, M. Meixner and E. Schöll 249
Molecular dynamics simulations of solid-phase epitaxial growth in silicon
K. Gärtner and B. Weber 255

Cluster Bombardment

Computer modeling and electron microscopy of silicon surfaces irradiated by cluster ion impacts
Z. Insepov, L.P. Allen, C. Santeufemio, K.S. Jones and I. Yamada 261
Atomic scale modelling of Al and Ni(111) surface erosion under cluster impact
E.E. Zhurkin and A.S. Kolesnikov 269
Molecular dynamics study of damage formation characteristics by large cluster ion impacts
T. Aoki, J. Matsuo and G. Takaoka 278
Direct simulation Monte Carlo method for gas cluster ion beam technology
Z. Insepov and I. Yamada 283
MD simulation of surface smoothing due to cluster impact
T. Muramoto, N. Hirotani, K. Itabasi, A. Harada and Y. Yamamura 289

Miscellaneous

Nanoscratching of silver (100) with a diamond tip
D. Mulliah, D. Christopher, S.D. Kenny and R. Smith 294
PIC-MC simulation of an RF capacitively coupled Ar/H_2 discharge
E. Neyts, M. Yan, A. Bogaerts and R. Gijbels 300
Simulation study of secondary electron images in scanning ion microscopy
K. Ohya and T. Ishitani 305
Quantum description for the effects of strained layered superlattices on channeling radiation
S.V.S. Nageswara Rao, L.N.S. Prakash Goteti and A.P. Pathak 312

Author index 317
